

New hires.  
Cross-training.  
Seasonal peaks.

Get company-wide, all-access  
anytime learning for a full year for  
\$390!

The **Sage 100 Contractor Comprehensive Anytime Learning package** is your “all access anytime” pass to ensure everyone in your organization gets the maximum benefit from the software you already own. It’s the ideal way to learn the software, get new hires up to speed, learn or refresh skills, or cross-train employees to cover absences or seasonal peaks.

### Your ready-to-go training plan

Anytime Learning lessons are “bite-size,” instructor-narrated videos showing step-by-step how to perform over 150 tasks in your Sage 100 Contractor software. Available to everyone in the company, the subscription offers help for everything from basic navigation and setup, to daily processing, project management, custom report and form design, and year-end procedures—making it a cost effective and convenient way to ensure your team knows how to properly use the software you’ve invested in.

Anytime learning lessons are available 24/7 so every employee in your company can view (and review) these lessons as often and whenever they need – simply using a computer with an internet connection.

### One price: All access. All employees. All year.

- If we update a lesson, you get access to the latest version.
- If we create a new lesson, you get access to that too.
- If you hire a new employee, they get access to all the lessons.
- If you need to refresh skills for infrequent tasks, employees view the lessons they need.

In fact, you and your entire team get access to every **Anytime Learning** lesson we create or update during your one-year subscription period!
